

RULE CHANGE

Information Bulletin #1635

4 September 2017

Supported by:

Australian Government
Australian Sports Commission

Affected Discipline:

Road Race

Rule Pertains to:

Triple Clamps

Current Rule in the 2017 Manual of Motorcycle Sport:

10.21.4 Permitted Modifications

10.21.4.1 The following may be replaced or modified:

....

- i) Handlebars, and handlebar mounted levers, but replacement handlebars must be mounted in the original position on the fork assembly or top clamp.

New Rule after Change:

10.21.4 Permitted Modifications

10.21.4.1 The following may be replaced or modified:

....

- i) Handlebars, handlebar ends, grips and handlebar mounted levers. Handlebars may be repositioned underneath the top triple clamp ~~providing no other modifications are required to do so. But replacement handlebars must be mounted in the original position on the fork assembly or top clamp.~~

- j) The Top Triple Clamp may only be changed to a commercially available clamp to accommodate for the repositioning of the standard handlebars or Clip On Handlebars, provided it is of the same offset as OEM clamp.

Rationale:

The new rule is to make it easier for production motorcycles to reposition the standard or clip on handlebars without them interfering with fairing panels or fuel tanks.

Rule change effective from:

Immediate
