MA Safety - Drug and Alcohol Policy
Testing Procedures

1. Introduction

Motorcycling Australia (MA) and the State Controlling Bodies (SCBs) are committed to providing a safe environment for employees, participants, officials and volunteers. The sport recognises that drugs and alcohol can affect an individual’s ability to participate in motorcycle events and activities.

This procedure should be read and applied in conjunction with the MA Safety– Drug and Alcohol Policy.

The MA Safety – Drug and Alcohol Policy does not replace or in any way affect the anti-doping testing that may be carried out by ASADA or by MA under the Anti-Doping Policy.

For avoidance of doubt the Anti-Doping Policy will prevail over this Safety Policy.

2. Purpose

This procedure sets out how MA and its SCB’s will achieve its policy objective of ensuring that individuals are free of the hazards that may be associated by drugs and alcohol and forms part of MA’s safety initiatives. MA and the SCBs requires cooperation and support of all those involved in motorcycle sport.

3. Scope

These procedures apply to all people as defined in the MA Safety– Drug and Alcohol Policy.

4. Content

These procedures establish the process to be followed in implementing the MA Safety – Drug and Alcohol Policy, including:

- How drug and alcohol testing will be conducted;
- The actions to be followed in response to drug or alcohol tests including the immediate response and follow-up actions of;
  - Penalties; and
  - How matters of confidentiality and disputes will be handled.

5. Testing methods and Limits

5.1 Testing Methods

MA and its SCBs may conduct drug and alcohol testing, consistent with these procedures.

Screening drug tests will be undertaken using the following methods:

- An oral swab with reference to AS4760 - Procedures for the collection detection and quantification of drugs in oral fluid.
  Drug confirmation tests will be undertaken in accordance with the above mentioned Australian Standard.
- Alcohol tests will be undertaken using alcohol breath analysers in accordance with AS/NZS 3574:1997 – Breath Alcohol testing devises for personal use.
5.2 Testing Limits

5.2.1 Screening Test:

The initial test is performed by an immunoassay test (screening test). The following substances will be screened:

<table>
<thead>
<tr>
<th>Substance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amphetamine (AMP)</td>
</tr>
<tr>
<td>Benzodiazepine</td>
</tr>
<tr>
<td>Cannabinoid (THC)</td>
</tr>
<tr>
<td>Cocaine (COC)</td>
</tr>
<tr>
<td>Methamphetamine (MET)</td>
</tr>
<tr>
<td>Opiate</td>
</tr>
</tbody>
</table>

5.2.2 Blood Alcohol Target Concentrations

<table>
<thead>
<tr>
<th>Substance</th>
<th>Concentration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alcohol</td>
<td>0.00 g/100ml</td>
</tr>
</tbody>
</table>

6. Event testing

6.1 Testing Person

Random drug and alcohol testing will be conducted at MA and SCB sanctioned events by an appropriately qualified or competent Tester (Testing Person).

The testing person can be one of the following:
- Part of the medical team at the event;
- An Event organiser competent and approved by MA in using the tests;
- A nominated person competent in using the tests (i.e. Senior Official or Relevant Controlling Body representative);
- Member of the State Police force; or
- A contractor approved by MA or the relevant SCB

The Testing Person must ensure that at all times:
- Be Independent and impartial;
- Follow the Integrity and accuracy of the drug testing process;
- Quality assurance; and
- Confidentiality is adhered to

The testing person will develop and implement an operationally appropriate selection process which must meet the satisfaction of relevant Australian Standards.

6.2 Selection

Testing may be conducted upon any person to whom the Policy applies to detect the presence of alcohol or a Prohibited Substance in the following circumstances:
6.2.1 Random Testing

Participants will be selected by printing the entry list, and grouping entries into respective classes. Media, officials and teams lists will also be used.

6.2.2 Target Testing

a) When the event organiser and/or officials suspects, on reasonable grounds, that a person is under the influence of alcohol or a Prohibited Substance (see Suspicion testing);
b) If a participant returns a non-negative result – they will be targeted for testing for a period of 12 months from the day they returned the non-negative result. Their names will automatically be entered into the selection.

6.2.3 Voluntary

Testing may be undertaken on a voluntary basis if a participant requests a Test prior to or during the Event.

6.2.4 Suspicion testing

If the Clerk of Course or Steward has observed or received advise that a member is showing signs of being under the influence of drugs or alcohol, it is their responsibility to act on this information. On the basis that reasonable suspicion is established, the individual concerned may be required to undertake a drug and/or alcohol test.

Typical indicators of impairment due to drug or alcohol include:

- Slurred or impaired speech;
- The person’s breath smells of alcohol;
- The person staggers, their movements are erratic and off target;
- The person admits to drinking certain quantities of alcohol;
- The person’s eyes are bleary and heavy;
- The person exhibits a dulled tired appearance;
- The person is aggressive in their speech or manner;
- The person’s pupils are large with sluggish reaction to light;
- The person behaves in an unusual, dangerous, erratic or euphoric state,
- Evidence of substance misuse within events which can be linked with reasonable certainty to an individual.

6.3 Timing

Because the MA Safety – Drug and Alcohol Policy is a safety initiative, testing can be carried out at any time throughout the event. Testing people are encouraged to ensure testing is undertaken before on-track participation.

6.4 Notification

6.4.1 General Notification to Competitors or Officials

Participants must be informed by written notice or in the Supplementary Regulations at least 24 hours prior to any testing being conducted during the event. They do not need to be informed of the actual times or dates of when the tests will be conducted. Evidence of such notice being given must be lodged with the Stewards prior to any tests being performed.

6.4.2 Event Notification

Participants will be notified at sign on or directly in person that they have been selected for testing under the MA Safety – Drug and Alcohol Policy.
The Testing person will provide participants with information regarding the test they will undertake.

Participants are required to read and understand the Acknowledgement and Declaration form confirming their acceptance to complete the test. The form must be completed and signed by the participant (and guardian if required).

A Participant making a false declaration is subject to Penalties.

Participants must report to the testing area immediately upon being notified.

---

**Sample Notification**

Dear Participant,

You have been randomly selected to participate in illicit drug screening under Motorcycling Australia’s Safety - Drug and Alcohol Policy (enclosed). The purpose of this policy is to address the possibility of events being adversely affected by people who have drugs and/or alcohol in their system.

You are required to provide a urine sample suitable to screen for illicit drugs.

The drug screening equipment is called CupLab, which is used to test for illicit, restricted and some currently legal drugs which have the potential to cause impairment, eg, cannabis and hashish, opiates (such as heroin and morphine), cocaine, amphetamine type substances (such as speed and ecstasy), THC and others.

Please make your way immediately to the Race Secretaries Office, the Race Secretary will direct you to the testing area and ask for MA’s nominated Testing Person eg; Jane Doe.

You are required to read, understand and complete the Acknowledgement and Declaration Form (enclosed) prior to making your way to the testing area. **Penalties apply if you provide false or incorrect information on this Declaration Form.**

Please inform the testing person about any medications (prescribed or non-prescribed) or other drugs that you have used during the last week which may affect the drug screen.

You are required to provide a sample using the CupLab in the privacy of the nominated testing area. If you are unable to provide a sample immediately you must wait, under the supervision of the testing person, until a sample can be obtained.

You are required to provide the CupLab sample to the Testing person to record the results.

Any Participant testing positive for prohibited substances for the first time will:

- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system.
- Successfully undertake further testing for prohibited substances / or alcohol for a period of 12 months.
- Be required to undertake a recognised counselling program and deliver proof of successful completion.

Any Participant testing positive for prohibited substances for a second time **within 12 months (Probationary Period) will:**

- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Automatically suspended from participation for a period of six (6) months;
- Fined an amount of $2,000 (plus GST)
- Be required to undertake a recognised counselling program and deliver proof of successful completion; and
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system after this six month suspension to unsuspend the Participants Licence.

Any Participant testing positive for prohibited substances for a second time on record will:
- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Suspended from participation for a period of three (3) months;
- Fined an amount of $2,000 (plus GST)
- Be required to undertake a recognised counselling program and deliver proof of successful completion; and
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system after this three month suspension to unsuspend the Participants Licence.

Any Participant testing positive for prohibited substances for a third time on record will:
- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Suspended from participation for a period of three (3) years
- Subject to further action undertaken by the Appellate Body, including the application of a fine up to the limit provided for in Competition rules and conditions under which the Participant may return to the sport.

A negative result will allow you to continue normal participation.

Refusing to complete the illicit drug screen will automatically suspend your participation of the respective event as identified by MA's Safety - Drug and Alcohol Policy.

Please take your time in completing this documentation.

If you have any questions regarding the procedures, please discuss these with the testing person.

6.5 Designated area

Where it is not specified in the notification information, a designated testing area will be established at each event. Participants will be required to enter the testing area one at a time to undertake the test.

A designated testing area would ideally include a private area with a table and chairs to fill in the paperwork, and a designated toilet such as a portaloo or private toilet for urine testing.

Prior to the test being conducted participants will be requested to provide the completed Acknowledgement and Declaration form. They will also be required to provide their full name, date of birth and MA Licence. These details are recorded on the Control Form.

6.6 Representatives

Participants are entitled to have a representative and/or interpreter accompany them to the testing area.

If a participant is a minor (under 18 years of age) they are required to bring a parent or guardian with them.
6.7 Follow up testing

Any member who returns a non-negative test result for drugs will be subject to follow up testing for a period of 12 months. This period is known as the ‘Probationary Period’.

If no further non-negative results are reported in the Probational Period, the member will be placed back in the usual random selection pool.

7. Alcohol Testing Procedure

- All alcohol testing procedures shall comply with AS/NZS 3547:1997 Breath alcohol testing devices for personal use.
- All samples will be collected, transported and analysed in accordance with AS 4760:2006.
- The person being tested will be required to supply an air sample from their lungs direct into an approved breath analysis instrument. The sample must be of sufficient volume to obtain a valid reading on the instrument.
- Competitors, crew members or officials being tested will be asked not to consume any substances by mouth for a period of 5 minutes prior to any breath analysis test being carried out.
- The following extract must be read to competitors or officials prior to undertaking testing:

  “You are about to have your expired air tested to ensure compliance with MA’s Anti-Doping Policy in relation to the presence of alcohol in your body. Should the test be positive, a further test will be undertaken shortly to confirm the test. Please follow the instructions of the testing official.”

- If the test indicates blood alcohol content of 0.01 g/100mL – Blood Alcohol Content (BAC) or above, the person is required to do a second test. The following must be read to the competitor or official after the initial test:

  “Your expired air has indicated the presence of alcohol in your body, this is a breach of the MA Anti-Doping Policy. Another test will be performed shortly to confirm the initial test. You will be required to be accompanied by a witness at all times for the next 20 minutes. You will not be permitted to consume any substance by mouth until after the test’.

  If a Participant fails to comply with these directions the original result will be recorded on file.

  No other comment should be made and the initial reading must not be disclosed

- The second test must be carried out no sooner than 15 minutes and no more than 20 minutes after the original test.
- The person being tested must refrain from taking any fluid or substance during the waiting period. This includes smoking.
- The participant, crew member or official shall be accompanied by a witness appointed by the Testing Official for the entire period between the 2 tests.
- If the secondary test result is 0.00 g/100mL BAC, the result will be deemed as negative and the person may return to their normal duties. No record will be entered onto the database.
- If the result of the secondary test is above 0.00 g/100mL BAC then a positive result will be recorded. The Tester will notify the Steward of this result.
- The result of all tests performed must be recorded, together with the names of the competitor, crew member or official and the witness, the time and date of the test and the result of the test eg, OK if 0, or actual reading if >0.
- After completion of the second test, the competitor, crew member or official must be advised by the testing official of the result of both tests, that is, the reading noted on the instrument.
- If the second test is above 0.00 g/100mL BAC the Participant, crew member or official will be excluded from participating or undertaking their duties.
- The results will be recorded on the database.
7.1 Alcohol Blood Testing

Any competitor, crew member or official detected with a blood alcohol content above 0.0g/litre as a result of a blood test performed by a Testing Person will be subject to sanctions as per clause 6 (Penalties) of the MA Safety – Drug and Alcohol Policy which can be viewed at www.ma.org.au.

8. Drug testing procedure

- All samples will be collected, transported and analysed in accordance with AS 4760:2006.
- Drug tests will be conducted in designated areas at events as advised.
- All drug testing procedures are to comply with relevant Australian Standards.
- The participant, crew member or official will be required to supply either an oral fluid sample or urine sample in the appropriate testing device provided to them by the Testing Person. The sample must be sufficient to obtain a valid reading on the instrument.
- If a negative screen result is returned the collected specimen will be disposed of and the person may return to their duties.
- If a non-negative screening result is returned, the participant, crew member or official is required to remain with the Testing Person. A secondary test may be carried out no more than 60 minutes after the original test. For urine screening, the sample may be utilised in a secondary kit.
- The person being tested must remain with the Tester and refrain from taking any fluid other than water during the waiting period. This includes smoking.
- The Tester will notify the Steward under strict confidentiality.
- The participant, crew member or official will not be permitted to participate or undertake their duties before testing is undertaken. This could include voluntary withdrawal of the event.
- Failure to submit to a test without an acceptable reason will be regarded as a non-negative result and will be treated accordingly.

9. Procedures for Responses and Penalties

The RCB may appoint a Contractor that has access to a Laboratory to be actively involved in the response to any non-negative or positive drug or alcohol testing result.

The Contractor will be responsible for ensuring compliance with the relevant Australian Standard for the collection, transportation and analysis of the Sample.

Resting results will be defined as one of the following three testing outcomes:

- Negative. This means a result below the nominated level used for initial screening/testing.
- Non-negative. This is an initial positive result obtained by an accredited tester using a screening device. This screening result is then subject to confirmatory testing by an external accredited testing laboratory.
- Positive. This is where a non-negative screening result has been subsequently confirmed positive by an external accredited testing laboratory.

9.1 Screening test result is negative

If a participant, crew member or official returns a negative result for a drug or alcohol screening test, the collected specimen will be disposed of and the person may return to their normal duties. No record of the test will be recorded on their personal file.
9.2 Screening test result is non-negative or positive

9.2.1 Alcohol

Where an alcohol secondary result is greater than 0.00g/100mL BAC, it will be deemed a positive result. The participant, crew member or official will be deemed unfit to continue participation at the event.

9.2.2 Illicit Substances

When a test returns a non-negative or positive result for illicit substance(s).

9.3 Penalties

Any Participant testing positive for prohibited substances and/or alcohol will take no further part in competition at that event. The Participant’s MA Licence will be suspended and will only be unsuspended upon compliance with the requirements of the penalties. Any parties returning a positive result will not be permitted to enter Restricted Areas (all areas except spectator areas).

Any Participant who provides a false Declaration is subject to Penalties listed in the current version of the Manual of Motorcycle Sport.

9.3.1 First Positive Test result

Any Participant testing positive for prohibited substances for the first time will:

- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system.
- Successfully undertake further testing for prohibited substances / or alcohol for a period of 12 months.
- Be required to undertake a recognised counselling program and deliver proof of successful completion.

9.3.2 Second Positive Test result

Any Participant testing positive for prohibited substances for a second time within 12 months (Probationary Period) will:

- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Automatically suspended from participation for a period of six (6) months;
- Fined an amount of $2,000 (plus GST)
- Be required to undertake a recognised counselling program and deliver proof of successful completion; and
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system after this six month suspension to unsuspend the Participants Licence.

Any Participant testing positive for prohibited substances for a second time on record will:
9.3.3 Third Positive Test result

Any Participant testing positive for prohibited substances for a third time on record will:

- Be immediately excluded from event participation and prohibited from entering Restricted Areas (all areas except spectator areas).
- Suspended from participation for a period of three (3) months;
- Fined an amount of $2,000 (plus GST)
- Be required to undertake a recognised counselling program and deliver proof of successful completion; and
- Provide a pathology report confirming there is no illicit drugs or alcohol in the Participants system after this three month suspension to unsuspend the Participants Licence.

Once notified, the RCB will ensure:

- On notification of a non-negative test, list the result in the database under Fines and Suspensions and details of the breach (date, event, substance, action taken, sanction);
- Suspend membership (disciplinary suspension).
- Upload the signed drug testing acknowledgement form from the event to the member record
- File the original in the event file;
- The lab report (if available) is placed in a secure location;
- Notify rider of sanction / result, include the relevant information sheet;
- Note in fines and suspensions letter sent and date;
- Notify Appellate body (if required)
- Upload letter to rider record.

It is recommended that a letter / email be sent to the individual with the relevant drug information sheet (i.e. cannabis, cocaine etc).

First Breach:

Contravention of MA Safety - Drug and Alcohol Policy (example)

At the “name of event” held at “name of venue” on the “date” a random safety test for illicit substances was carried out in accordance with the MA Safety - Drug and Alcohol Policy. Available for viewing at www.ma.org.au

Your name was selected at random and you signed a declaration acknowledging your permission and conditions to perform testing.

A urine sample, saliva and/or breath analysis was conducted by certified independent operators and your test returned a non-negative reading for “name of substance”.

In accordance with the MA Safety - Drug and Alcohol Policy you were not permitted to participate in the above event.
[Laboratory testing of a second sample has confirmed the positive on site test results].

Due to the above, your Licence has been suspended, and you will not be able to participate in any MA sanctioned activity or purchase a one event licence until MA, or your State Office receives a blood test result clearing you of any illicit drugs in your system.

You will be subject to target testing over the next 12 months from the date of this letter and if you record another non-negative result within this probation period your licence will be automatically suspended for a period of 6 months and fined an amount of $2,000 (Plus GST).

You are also required to undertake a recognised counselling program and deliver proof to MA or your State Body of your successful completion. You have 12 months at the date of this letter to complete this program.

In the interests of our sport, fellow competitors and your own health I would encourage you read the attached fact information sheet, and we look forward to your further participation at Motorcycling Australia sanctioned events.

9.4 Report by Testing Official

a) In the case where no non-negative readings were achieved on the confirming test, the results shall be included with the Stewards' report of the meeting.

b) In the case where 1 or more non-negative readings were achieved on the confirming test, the original of the report must be hand delivered or sent to the RCB with all appropriate Stewards Reports.

10. Procedures for refusal to undertake a drug or alcohol test

If a person selected to undertake any drug or alcohol test refuses to participate, a result of a confirmed non-negative test will be recorded and they will be stood down from participation at the event. The person will be targeted tested for a further 12 months and a non-negative result during this period will result in a six (6) month automatic suspension.

11. Prescribed Medication

a) If a person to whom this Policy applies considers there is a possibility that prescribed medication is affecting their ability to participate safely in an Event, that person shall inform the Event Organiser immediately. It is not necessary for the person to disclose the illness, ailment or the medication which they are taking.

If any doubts exist over banned substances it is recommended competitors contact the Drugs in Sport Hotline, tel: 13 000 ASADA (13 000 27232). If calling from outside Australia call: +61 2 6222 4200 alternatively GlobalDRO is an online tool which can be used to check the status in sport (e.g. prohibited or not prohibited) of registered medications and ingredients. The link to GlobalDRO is http://www.globaldro.com/AU/search.

b) If sub-clause 7.a (above) applies to the Participant, then:

i. they can participate in an Event if they can provide a medical clearance from their treating medical practitioner clearly stating the medication will not affect the participant’s ability to perform their duties (for a rider, it must state the medication does not affect the ability of the rider to control a motorcycle); or

ii. they cannot participate in the Event if they cannot provide such a medical clearance.
12. Exceptional Circumstances

Exceptional circumstances exist if the presence of the prohibited substance is beyond the control of the Participant (i.e. the Participant is administered the prohibited substance in hospital without their knowledge).

Exceptional circumstances do not exist merely because the participant:

a) Took the prohibited substance inadvertently, or

b) Did not know that the substance was prohibited. If any doubts exist over banned substances it is recommended competitors contact the Drugs in Sport Hotline, tel: 13 000 ASADA (13 000 27232). If calling from outside Australia call: +61 2 6222 4200. Alternatively Participants can check their substances online: http://www.globaldro.com/AU/search.

If the Participant claims to have taken a legal medication, the Testing Person may consider the following items in deciding the necessary action to be taken:

- A copy of a MA approved Medical Exemption;
- A copy of a prescription received from a medical practitioner accompanied a medical clearance from the Participants treating medical practitioner clearly stating the medication will not affect the Participant’s ability to perform their duties (for a rider, it must state the medication does not affect the ability of the rider to control a motorcycle);
- A copy of the receipt obtained following the purchase of an over-the-counter medication.

13. Confidentiality

The results of all Tests will be kept confidential to the organisation conducting the Test, the Event Organiser, any relevant SCB, and MA.

14. Rehabilitation and Counselling

MA recognises drug and alcohol dependency as a treatable condition. Any person who breaches clause 6 of MA Safety – Drug and Alcohol Policy must undertake a recognised counselling program and deliver proof of their successful completion and take appropriate treatment or steps to ensure their performance is not affected.

15. Record Management

Records and results relating to the provision of a sample for drug and alcohol testing will be confidentially stored as per record keeping guidelines

Records of the number of tests undertaken and the members tested will be kept to enable the regular review, and where necessary amendment of these Procedures.

16. Definitions

AIS means Australian Institute of Sport
ASC means the Australian Sports Commission established by the Australian Sports Commission Act 1989
Alcohol Testing means the testing of competitors and officials to determine the presence of alcohol in their body, by analysis of their expired air
Anti-Doping Policy means MA’s “Anti-Doping Policy” as amended from time to time and can be viewed at www.ma.org.au
ASADA means the Australian Sports Anti-Doping Authority
Drug Test means the testing of competitors and officials to determine the presence of prohibited substances in their body, by analysis of urine or saliva.

Drug Testing Authority means the independent drug program administrator, or an agency appointed by the IDPA or MA, or a national drug testing authority which;

a) Operates under its own statute, rules and regulations, and

b) Has samples analysed by an approved or an IOC accredited laboratory, or an agency which conducts testing on competitors or the detection of prohibited substances where the methods of testing substantially accord with IDPA or IOC procedures, and the sample is analysed by an MA approved or an IOC accredited laboratory.

Employee means a person employed on a part or full time basis by the track, or the event organiser, to carry out specified duties during an MA event.

Entrant means the person signing the Entry Form in that capacity.

Event means a motorcycling event sanctioned by MA directly, or indirectly through a SCB. This may include, but is not limited to, a race, training, coaching or testing and exhibitions.

Event Organiser means MA, a SCB, MA member club, promoter or any other entity having control of an Event. Also known as Promoter.

IDPA means the Independent Drug Program Administrator chosen by MA to administer prohibited substance testing.

IOC means the International Olympic Committee.

Location/Venue means any location or venue where an Event is taking place.

MA means Motorcycling Australia Limited.

Manual means the “Manual of Motorcycle Sport” produced by MA, as amended from time to time. This means and includes any policies, rules or documents which MA determines amends or supplements the “Manual of Motorcycle Sport” from time to time and is available for viewing at www.ma.org.au.

MAP means MA’s Medical Advisory Panel.

Member means a person holding current MA licence.

Negative test result. This means a result below the nominated level used for initial screening/testing.

Non-negative test result. This is an initial positive result obtained by an accredited tester using a screening device. This screening result is then subject to confirmatory testing by an external accredited testing laboratory.

Notification means the process for informing the Participant that they have been selected to undergo a drug or alcohol screen for the purpose of Safety Testing.

Official means a person who administers, manages, provides a contracted or volunteer service, assists or is otherwise involved in motor sport under the auspices of MA, involved in contributing to a MA event, other than as a competitor, or medical or equivalent health practitioner.

Participant means a person who is an entrant, rider, crew member, contractor or employee of a contractor, or an employee or volunteer for the track or MA.

Policy means the MA Safety – Drug and Alcohol Policy.

Positive test result - this is where a non-negative screening result has been subsequently confirmed positive by an external accredited testing laboratory.

Prohibited Substance means any substance which is listed in the “List of Prohibited Illicit Drugs” published by the Australian Sports Commission from time to time.

Recognised medical authority a) the MAP, or

b) an authority recognised by the MAP which may authorise the use of a prohibited substance.

Restricted Areas All racing and competition areas including pit area, pit lane, paddock areas etc. Non restricted areas include spectator areas.

Sample means a sample provided in conjunction with a Test.
SCB means a “State Controlling Body” for the sport of motorcycling as recognised by MA under its constitution.

**Significant Incident** means any incident which occurs during an Event that results in a person requiring medical treatment, property damage, or any other incident which, in the opinion of the Event Organiser (or its nominee) requires further investigation. This latter category may include dangerous occurrences or near misses during a race.

**Test** means any test conducted under this Policy to detect the presence of alcohol or a Prohibited Substance.

**Testing person** can be one of the following:
- Part of the medical team at the event;
- An Event organiser competent and approved by MA in using the tests;
- A nominated person competent in using the tests (i.e. Senior Official or Relevant Controlling Body representative);
- Member of the State Police force; or
- A contractor approved by MA or the relevant SCB.

### 17. Disputes

Any dispute regarding the implementation of this procedure should be referred to:

Contact Claire Lawrence, Risk and Compliance Manager
Email: risk@ma.org.au
Phone: 03 9684 0500

### 18. Further Information

Contact Claire Lawrence, Risk and Compliance Manager

### 19. Adoption by the Board

The MA Safety - Drug and Alcohol Policy testing procedures were approved by the Motorcycling Australia Board on 17 September 2014.

### 20. Policy Review

This document will be reviewed annually and revised as needed.
